

# Gallus R 200 B / S 02

## Completely rebuilt label-printing and die-cutting machine

Rotary printing machine, state-of-the-art rebuilt by factory-trained engineers, for the production of self-adhesive roll-labels and similar products

Modular machine system, which can be supplied in a configuration as requested, also in combinations, and with excellent possibilities for upgrades and extensions

### Printing and processing

- UV letterpress
- UV screen
- UV flexo
- Hotfoil-stamping, with options:
  - Foil-saving control
  - Hologram-insetting
- Coldfoil-application
- Production of booklet-labels
- Production of multi-layer-labels
- UV-varnish
- Lamination
- Flatbed die-cutting
- Rotary die-cutting
- Hole-punching
- Length-slitting
- Cross-cutting/stacking

### Technical data

Web width	max. 210 mm
Printing width	max. 200 mm
Printing length	9" - 18"
Printing length increments	1/8"
Die-cutting width	max. 200 mm
Die-cutting length flat	max. 181 mm
Die-cutting length rotary	9" - 18"
Die-cutting length increments	1/8"
Machine speed	max. 90m/min
